

In the Specification:

Please replace the Abstract with the following amended Abstract:

5

The invention relates to a system for browsing a collection of information units, such as audio or video files, comprising presentation means for presenting an information unit from said collection, and attribute means for associating a respective
5 information unit with an attribute value for at least a first attribute. The system according to the invention randomly selects information units which meet certain criteria for said first attribute.

Fig. 2

10

Please replace the paragraph on page 1, lines 17-18 with the following amended paragraph:

Recent developments in music compression, storage capacity and broad-band
5 networks have made it possible that consumers have access to large quantities of
information of various kinds. For example, a database of compressed music files may
be stored on the hard disk of a personal computer and browsed and listened to by the
user. Alternatively, music files may be stored on a remote server, and accessed via a
computer network such as the internet. ~~Examples of such on-line jukeboxes can be~~
10 ~~found at www.musicmatch.com, www.mp3.com and~~
~~www.music.sony.communication/jukebox.~~
